

Pillar	Focus Area	20 · Needs work	40 · Developing	60 · Accomplished	80 · All-Star
Performance knowledge & application	Warm-ups & prep	Warm-ups lack structure. Not aligned to HML. Preparation quality varies day to day.	Warm-ups follow a general template. Some individualization present, but load-day alignment is inconsistent.	Warm-ups consistently follow team principles and align with HML. Athletes leave ready to train.	Individualized, principled, and adaptable. Other coaches reference your prep model as the standard.
	Strength	Selections and cues aren't grounded in team principles. Technical execution wavers.	Programming aligns with basics; coaching cues are developing. Some technical inconsistency in the room.	Solid programming aligned with team principles. Clean cueing, athlete progression tracked and adjusted.	Elite programming using dynamic correspondence to target specific performance problems. Athletes and peers seek your input to raise their own standard.
	Power	Limited exercise variety. Cueing to intent (bar speed, jump quality) is inconsistent.	Uses the main plyometric/ballistic categories (medballs, jumps). Load and volume choices still developing.	Power selections match the training goal and athlete need, using a wide variety of exercises. Cueing to intent is clear and consistent.	Innovative selections informed by short/long SSC and plyometric taxonomy. Uses data to titrate load and intent, and contributes to method development.
	Speed	Speed work is ad-hoc. Small-group management limited. Not integrated with technical coaches.	Basic acceleration and max-velocity drills used. Group management and technical integration improving.	Confident across the speed continuum, using normative GPS data to guide loads. Needs high-speed camera footage to spot movement deficiencies.	Adapts to individual and positional needs without needing camera footage to spot deficiencies. Bridges Performance / technical-coach conversations seamlessly.
	Fitness	Conditioning not programmed to work:rest. Energy-system rationale unclear.	Uses work:rest but the rationale is inconsistent. Adherence to sport demand still developing.	Fitness planned to work:rest and matches sport demand. Athletes track progression and buy in.	Sophisticated periodization of energy systems. Others reference your model as the department standard.
	Assessment skills	Rarely uses screen or testing data. Programming decisions not clearly linked to assessment.	Uses the movement screen, but follow-through into programming is inconsistent.	Movement screen and testing directly inform programming. Athletes see the connection.	Screens feed a personalized development loop, including advanced table-testing protocols. You refine assessment protocols for the team.
	Program design	Blocks are siloed. Strength, power, speed, and fitness don't integrate cleanly.	Basic integration of pillars. Individualization is inconsistent across athletes.	Well-integrated across pillars. Individualized for position and athlete need.	Elite integration. Programs are adaptable, evidence-informed, and teach other coaches how to design.
Coaching effectiveness	Coaching & instruction	Cues generic. Interventions rare. Athlete engagement variable.	Cues correct but not always tailored. Some intervention. Language is adapting to athletes.	Precise cueing, timely interventions, high engagement. Language adapts to the athlete.	Masterful coaching. Your presence, cues, and interventions raise the standard of the whole room.
	Tech & data	Rarely uses AMS, VBT, or force plates. Data isn't fed back to athletes.	Uses core tools, but feedback loops with athletes are inconsistent.	Uses AMS and performance tools reliably. Data closes the loop with athletes.	Uses data creatively to change practice. Sets the standard for how tech drives decisions.
	Schedule management	Weekly plan isn't built from HML. Conflicts and reactive changes are common.	Uses HML in planning; time discipline improving. Challenging conversations still tend to be avoided.	HML drives the week. Time-disciplined. Holds accountability conversations with managers and coaches.	Anticipates conflicts and resolves them before they land. Coaches trust your calendar.
	Sport-specific	Limited sport knowledge outside Performance. Integration with technical coaches is thin.	Basic sport-specific language. Some integration with hitting and pitching coaches.	Fluent in sport-specific tasks. Regularly integrates with technical coaches.	Deep sport IQ. Actively shapes how Performance, hitting, pitching, and defense integrate.
Universal competencies	Evidence-based	Practice not grounded in evidence. Rarely reads or applies research.	Reads occasionally; application is patchy. Some link between practice and evidence.	Practice consistently grounded in evidence and team principles. Contributes to internal discussion.	Contributes evidence to the department. Runs internal case studies or research that shift practice.
	Innovation & risk	Sticks to what's comfortable. Rare to challenge convention or run new experiments.	Willing to try new ideas occasionally; typically waits for others to lead the way.	Regularly proposes experiments; comfortable challenging convention with rationale.	Drives departmental innovation. Other coaches adopt your experiments as new standards.
	Problem solver	Notices problems but rarely acts. Waits for others to solve or escalate.	Addresses problems in your own area. Slower to see cross-area issues.	Actively identifies and resolves problems in and beyond your area.	Sees systemic issues early, convenes others, produces durable fixes across the department.
	Modelling & growth	Punctuality, presence, or professionalism slip. Focus varies day to day.	Generally professional; occasional inconsistency in standards or focus.	Consistently punctual, prepared, focused. Leads by example.	Sets the professional bar for the room. Growth mindset visible in every setting.
	Team communication	Cross-department communication is minimal or reactive. Rarely holds players accountable to GPS, punctuality, or prep/recovery routines, and Slack discipline is variable.	Communicates when prompted; accountability building (works with some players, not others); regulation under stress still developing.	Communicates proactively across departments and follows up in Slack. Holds accountability to GPS, punctuality, and prep/recovery consistently. Regulated under stress.	Sets the standard for cross-departmental candor and clarity, escalating problems promptly to supervisors. Others follow your model.

General Org Areas · Applies Across Every Red Sox Performance Role

From the BBOps Mid-Year Review Form - the same across every role on this chart. Scored by averaging the detailed focus areas above that map to each competency.

Universal Red Sox Competencies & Culture Alignment	Problem Solving	Identifies, analyzes, and solves problems in a process- and systems-oriented manner; thinks critically and strategically about problems; is solutions-oriented.
	Teamwork & Collaboration	Works effectively with others; fosters a high-challenge and high-support environment; makes everyone feel valued and empowered to contribute; can 'disagree and commit'.
	Clarity of Communication	Communicates in a structured and organized manner, both verbal and written, to a wide range of audiences; demonstrates genuine interest and empathy to others' ideas, concerns, and feedback.
	Time Management & Prioritization	Deciphers between tasks based on their urgency and importance, and focuses on the highest-leverage priorities; sets and meets realistic goals and deadlines.
	Baseball Analytics & Player Development Acumen	Demonstrates working knowledge of modern baseball metrics and contemporary player development practices, serving as the organizational language for evaluating performance, strategy, decision-making, and development opportunities; applies a baseline understanding of key metrics and development methodologies in day-to-day responsibilities.
	Embodying Our Organizational Culture	Embodies our organizational values of Honesty (being open, transparent, and respectful with yourself and others; willing to have difficult conversations), Humility (acknowledging mistakes, willing to ask for help, and exhibiting a growth mindset), and Relentlessness (continuously seeking new and improved ways of doing things, unwavering commitment to winning); proactively supports our organization's commitment to Diversity, Equity, Inclusion, and Belonging (DEI&B;).
People Management Competencies (for current people managers)	Ability to Influence People	Builds trust and rapport with team members and others throughout the organization; inspires and motivates others; provides clear direction and empowers the team to achieve results; delivers honest feedback where achievements are recognized, and people are held accountable.
	Ability to Influence Culture	Embodies our organizational culture (Honesty, Humility, Relentlessness), and holds others accountable for their actions and behaviors; actively supports building diverse, equitable and inclusive teams by ensuring the use of inclusive hiring practices, identifying and eliminating barriers that hinder access and opportunities for advancement, creating a psychologically safe environment for all team members, being an active ally who challenges inappropriate or threatening behavior, among others.
	Ability to Influence Process	Designs, integrates, and continuously improves processes in alignment to our organizational KPIs; influences and persuades within their immediate team and across the organization.
