

Pillar	Focus Area	20 · Needs work	40 · Developing	60 · Accomplished	80 · All-Star
Domain knowledge & expertise	Program standards & quality control	Standards vary coach-to-coach. Program quality is inconsistent across the group.	Basic standards articulated; reviews happen on request rather than proactively across the department.	Clear standards with proactive, regular reviews. Underperforming coaches get targeted development plans.	Standards drive measurable improvement in coach output over time. Quality benchmarks used, refined, and shared as best practice.
	Periodization & planning oversight	No department-level annual or seasonal plan. Coaches plan in isolation.	Annual plan exists but sport-calendar alignment is inconsistent.	Solid annual and seasonal plan aligned to spring training, in-season, and off-season phases. Coaches build off it.	Adaptive planning with contingencies for trades, call-ups, and rehab returns. Sets the industry standard for the level.
	Coaching & instruction standards	Session delivery expectations unclear. Little observation or feedback happening.	Basic delivery expectations set. Occasional structured observation of coaches.	Non-negotiable delivery expectations covering cues and player engagement. Regular observation and feedback loop, with shared language across the staff.	Coaches hold each other to the standard without top-down enforcement. Coaching-culture-defining observation model; coaches request feedback, not avoid it.
	Sport science & sport integration	Weak link to sport outcomes. Cross-department integration is thin.	Some connection to sport outcomes. Cross-department integration developing.	Strong working relationships with pitching, hitting, and athletic training. Cross-department integration flows naturally.	Sought out by baseball operations and technical coaches as a strategic partner. Actively shapes how sport science drives sport-outcome decisions across the front office.
Teach, influence, build relationships	Staff development & mentorship	No individual development plans. Mentorship is ad-hoc.	Some development plans; mentorship inconsistent across staff.	Every coach has a development plan covering technical and behavioral growth. Mentorship is structured, active, and psychologically safe.	Structured succession planning in place; coaches leave the group stronger, ready for senior roles. Sought out for input on staffing and succession.
	Schedule & operations management	Reactive to conflicts. Resource allocation is unclear or contested.	Manages known conflicts. Resource allocation is developing but not always transparent, and complexity (travel, roster changes) still causes strain.	Anticipates conflicts across affiliates and levels. Resource allocation is transparent and fair.	Built systems and infrastructure that keep the department running at a high level even in your absence. Rare operational surprises as the department grows.
	Problem Solving & Systemic/Architectural Innovation	Problem-solving is reactive. Innovation is rare or entirely coach-driven.	Some systematic problem-solving. Innovation pathway is forming but inconsistent, and ideas outside the leader's own are not always welcomed.	Systematic, evidence-informed problem-solving that digs to root causes, not just symptoms. Innovation pathway visible and used by coaches.	Department is a proven engine of high-quality innovation beyond S&C; itself. Other departments learn from your process.
	Modelling, humility & growth	Standards of professional behavior slip. Humility or growth mindset uneven under pressure.	Generally models the standards; comfortable taking feedback from above, less so from peers or staff.	Reliably models the professional behavior, standards, and growth mindset expected of staff, and actively seeks feedback from every direction.	Coaches point to your standards as the operating baseline. Humility and self-reflection are the expected norm, not an aspiration, because of how you behave.
	Communication, accountability & collaboration	Cross-departmental candor limited. Accountability applied inconsistently.	Communicates across departments; holds willing staff accountable but avoids it with resistant ones, and high-stakes conversations still tend to be avoided.	Candid cross-departmental communication. Holds accountability consistently across the staff.	Sets the standard for candor and accountability across the front office, including hard performance-management and change conversations. Trusted broker in hard rooms.
Technological proficiency & expertise	Technology governance & staff adoption	No department tech standards. Staff use of tech varies wildly.	Basic tech standards; staff adoption inconsistent across the group.	Clear tech standards. High staff adoption across AMS, VBT, force plates, GPS, and speed gates.	Tech governance is a competitive advantage, including leading procurement decisions. Adoption is uniform and expert-level.
	Data infrastructure & reporting	No reliable reporting infrastructure. Data-driven decisions are delayed or missing.	Basic reporting exists; some sport-relevance gaps in what gets surfaced.	Reliable reporting infrastructure turns data into sport-relevant decisions on cadence.	Reporting infrastructure sets the industry standard. Decisions are timely, precise, and shared.
Data analysis	Department-level data interpretation	Group-level patterns rarely spotted. Data used tactically only.	Some group-level pattern recognition. Insights inconsistently applied to decisions.	Group-level patterns drive scheduling, programming, and staffing decisions.	Predictive pattern recognition. Systemic decisions anticipate rather than react to trends.
	Evidence-based Culture & Methodological Innovation	No research or case-study culture. Practice doesn't evolve year-to-year.	Occasional research or case studies. Year-over-year evolution is slow.	Active research and case-study culture. Practice evolves annually with evidence.	Department is a research producer. Practices shift the field year-over-year.

General Org Areas · Applies Across Every Red Sox Performance Role

From the BBOps Mid-Year Review Form - the same across every role on this chart. Scored by averaging the detailed focus areas above that map to each competency.

Universal Red Sox Competencies & Culture Alignment	Problem Solving	Identifies, analyzes, and solves problems in a process- and systems-oriented manner; thinks critically and strategically about problems; is solutions-oriented.
	Teamwork & Collaboration	Works effectively with others; fosters a high-challenge and high-support environment; makes everyone feel valued and empowered to contribute; can 'disagree and commit'.
	Clarity of Communication	Communicates in a structured and organized manner, both verbal and written, to a wide range of audiences; demonstrates genuine interest and empathy to others' ideas, concerns, and feedback.
	Time Management & Prioritization	Deciphers between tasks based on their urgency and importance, and focuses on the highest-leverage priorities; sets and meets realistic goals and deadlines.
	Baseball Analytics & Player Development Acumen	Demonstrates working knowledge of modern baseball metrics and contemporary player development practices, serving as the organizational language for evaluating performance, strategy, decision-making, and development opportunities; applies a baseline understanding of key metrics and development methodologies in day-to-day responsibilities.
	Embodying Our Organizational Culture	Embodies our organizational values of Honesty (being open, transparent, and respectful with yourself and others; willing to have difficult conversations), Humility (acknowledging mistakes, willing to ask for help, and exhibiting a growth mindset), and Relentlessness (continuously seeking new and improved ways of doing things, unwavering commitment to winning); proactively supports our organization's commitment to Diversity, Equity, Inclusion, and Belonging (DEI&B;).
People Management Competencies (for current people managers)	Ability to Influence People	Builds trust and rapport with team members and others throughout the organization; inspires and motivates others; provides clear direction and empowers the team to achieve results; delivers honest feedback where achievements are recognized, and people are held accountable.
	Ability to Influence Culture	Embodies our organizational culture (Honesty, Humility, Relentlessness), and holds others accountable for their actions and behaviors; actively supports building diverse, equitable and inclusive teams by ensuring the use of inclusive hiring practices, identifying and eliminating barriers that hinder access and opportunities for advancement, creating a psychologically safe environment for all team members, being an active ally who challenges inappropriate or threatening behavior, among others.
	Ability to Influence Process	Designs, integrates, and continuously improves processes in alignment to our organizational KPIs; influences and persuades within their immediate team and across the organization.
